1 Introduction

A brief introduction to the ecological relevance of Ichneumonidae and the motivation for this research project.

2 Project Objectives

- Synthesizing the current state of knowledge on Ichneumonid wasps
- Identifying major research gaps
- Mapping experts and institutional actors in the field

3 1. Current State of Research

4 2. Methodology

A description of literature review strategies, approaches to expert identification, and research synthesis.

5 3. Knowledge Gaps and Research Questions

A critical synthesis of what remains unknown and which research directions are promising.

6 4. Potential Master's Thesis Topics

Concrete suggestions for future thesis projects derived from the review.

7 5. Conclusion

A brief summary and outlook for research on Ichneumonidae in Switzerland and beyond.
